Dkt. No.: PO92267

AMENDMENTS TO THE CLAIMS:

- 1. (Canceled)
- 2. (Canceled)
- 3. (Canceled)
- 4. (Canceled)
- 5. (Canceled)
- 6. (Canceled)
- 7. (Canceled)
- 8. (Canceled)
- 9. (Amended) A cooling device, comprising:

a planar heat pipe, comprising a top lid and a bottom lid engageable with the top lid to form an internal cavity, the planar heat pipe further comprising a wick structure and a working fluid in the internal cavity, wherein the top lid includes a top panel, which comprises a central flat region and a plurality of independent heat dissipating fins spirally arranged around the central flat region to form a spiral channel;

a fan seat, fitting over the planar heat pipe, and a cooling fan, mounted on the fan seat,

The cooling device of Claim 8, wherein the top panel of the top lid further comprises a plurality of fitting plates, and the fan seat comprises a plurality of supporting legs to be latched with the fitting plates of the top panel of the top lid.

AMENDMENT - 2 -

Dkt. No.: PO92267

- 10. (Amended) The cooling device of Claim 89, wherein the bottom lid comprises a plurality of fitting plates for fitting the fan seat.
- 11. (Amended) The cooling device of Claim 89, wherein the fan seat comprises a plurality of supporting leg to be fastened with the fitting plates of the bottom lid.
- 12. (Newly added) A planar heat pipe, comprising a top lid and a bottom lid engageable with the top lid to form an internal cavity, the planar heat pipe further comprising a wick structure and a working fluid in the internal cavity, wherein the top lid includes a top panel, which comprises a central flat region and a plurality of independent heat dissipating fins spirally arranged around the central flat region to form a spiral channel, and wherein the heights of the heat dissipating fins increase from the central flat region towards a periphery of the top panel.
- 13. (Newly added) The planar heat pipe of Claim 12, wherein the top panel of the top lid is circumscribed by four side panels.
- 14. (Newly added) The planar heat pipe of Claim 12, wherein the central flat region has a circular shape.
- 15. (Newly added) The planar heat pipe of Claim 12, wherein each of the heat dissipating fins has a conical shape.
- 16. (Newly added) The planar heat pipe of Claim 12, wherein the bottom panel is circumscribed by four side panels.
- 17. (Newly added) The planar heat pipe of Claim 12, wherein the wick structure comprises a first structure uniformly distributed on an internal wall of the AMENDMENT
